## JUST CLEANINGS

### TRAIL SMOKE EATERS WIN WORLD ROCKY MOUNTAIN CANADA BY DEFEATING U.S.

BASILE, Switzerland.—The Trail Smoke Eaters captured for a third straight world amateur hockey championship Sunday by defeating the United States in the final game of the tournament.

The Allan Cup champions from Trail B.C., were defending the title won last year by Sudbury Wolves and by Kimberley Dynamiters the previous winter.

One of the smallest crowds of the tournament, less than 1,000 persons, watched Trail win when Benoit scored two goals and Bunny Dame and Jim Morris one each, to give them the final game by a 4-0 score.

### PETER VERGIN DIES FEB. 11

Peter Vergin, 52-year-old Russian-born leader of the Doukhobors since 1927, died early Saturday in Saskatoon, following an operation about two weeks ago, from which he did not survive.

Probable successor to Peter Vergin is a 16-year-old grandson, who is a student in Saskatoon.

Peter Vergin's career in the colonies was a hectic one. He was in court on three occasions, once for perjury, another time for assault, again for forgery. Authorities have treated him with deportation twice but after legal battles he was permitted to remain in Canada.

### UNIFORMS FOR GAME OFFICERS

Dark green uniforms and Stetson hats may be worn by Alberta game wardens, depending upon what action is taken by the provincial government.

The plan has been advanced by the provincial game board and is to be considered by the provincial authorities.

Need of a uniform for the game wardens is said to have been due to persons refusing to stop when ordered to do so by game wardens dressed in civilian clothes.

Officials suggest that if a guardian is wearing a uniform that he can be recognized at once, there will be better observance of regulations and signals will not be disregarded.

### GROWING FRUIT IN ALBERTA

In most regions of Alberta certain kinds of fruit can be grown. In these times when the wheat dollar buys so little it might be well for farmers to consider growing some of their own fruit. Freight does not have to be paid on such commodities, nor do the prices have to be found when cash is scarce.

W.D. Albright, superintendent of the Dominion Experimental Sta. at Beaveridge in the Peace River district, has reported success in growing cherries, peaches, apricots, and small sour cherries.

The first two hybrid apples raised in the Peace River district were more than hundred barrel crops of choice apples previous season elsewhere," Mr. Albright writes.

## INTEREST CUT DECLARED ULTRA VIRES IN COURT ACTION AT EDMONTON

JUDGMENT SHEDDEN DOWN  
BY MR. JUSTICE HAFERD

In a judgement handed down in Calgary Monday, Mr. Justice S.J. Sheppard declared the Provincial Securities Interest Act, reducing interest on Alberta bonds 50 per cent, ultra vires of the Alberta legislature. The case was heard in the Supreme Court in Edmonton, February 2.

The action was brought by the Independent Order of Foresters with headquarters in Toronto.

Said Mr. Justice Sheppard: "The act in question is ultra vires not only for the reason that it is contrary to legislation, but for the further reason that the suppliant's right is a civil right outside the Provincial Securities Act, which cannot validly legislate in derogation of that right."

## LONG YEARS AGO

February 16, 1928

124 citizens cast their ballot Monday to elect the following members to the 1928 Legislative Council: Messrs. S. J. Garrett, J. A. Macdonald and W. A. Braisher.

D. E. Charbeloff left Sunday for the Pacific Coast and expects to be away for a couple of months.

Mrs. S.N. Wright and Geo. Appleyard were trustees from the Carbon district attending the Trustees' Convention in Edmonton.

H. Young has purchased a farm from Mr. W. Jennings.

"Bou Geant" is the feature at the Carbon Theatre this week.

## ANNUAL MUNICIPAL MEETING

The annual meeting of the ratepayers of the Municipal District of Carbon will be held on Saturday, February 18, at 1 p.m., in the Farmers Exchange hall. A good turnout of ratepayers is requested.

## HEAVY DEMAND FOR FORAGE CROP SEED

EDMONTON.—The Alberta Department of Agriculture reported that this season's demand for forage crop seed is estimated at 25,000 bushels of alfalfa seed, 10,000 bushels of lucerne seed, 10,000 bushels of timothy seed, 10,000 bushels of clover seed, 10,000 bushels of vetch seed, 10,000 bushels of sainfoin seed, 10,000 bushels of birdsfoot trefoil seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 bushels of orange clover seed, 10,000 bushels of red clover seed, 10,000 bushels of white clover seed, 10,000 bushels of yellow clover seed, 10,000 bushels of black clover seed, 10,000 bushels of blue clover seed, 10,000 bushels of green clover seed, 10,000 bushels of purple clover seed, 10,000 bushels of pink clover seed, 10,000 ## The Predicament Of Youth

No apology is needed for reverting to the problem of youth as it exists in Western Canada to-day after a decade of combined agricultural and economic depression. The weight of the problem becomes more pressing as the years roll along and young men and young women, more or less equipped for taking up the duties of citizenship and themselves, through no fault of their own, with place to go. It is a problem that will not go down, on the contrary it becomes more acute. It is a problem that will not cure itself, except perhaps over a long period of "better years," by which time many will have "ruined the lot" and will find themselves left behind.

During these ten years hundreds and thousands of these young people have grown to maturity and are not only willing but anxious to fulfil their natural destiny, that of earning their daily bread and a few of the joys of life and of marrying and rearing families of their own. But they have found their desire for a normal life thwarted in every direction with results that will be disastrous to themselves and the country, unless some solution is speedily found.

Reference is advisedly made to the ill effects of such a cancer on the body politic, for it is axiomatic that no nation can prosper if a large percentage of its youth is frustrated in its outlook on life and the future welfare of a nation thus afflicted is tarnished; for the youth of to-day are, or should be, the workers and counselors of tomorrow. The war was responsible for the loss of one generation. Is the depression to be the cause of the loss of another?

When the problem is viewed in this light it is immediately seen as one of great urgency, the only cause of its immediate effects being because of its long range impress upon the welfare and happiness of the people of the future.

### Temporary Palliatives

Direct relief and the provision of entertainment in cheap form, which we have had with us as an emergency specific for some years is not the solution of the problem. Such a measure, however, is necessary, merely of character, loss of morale and for a certain percentage, even criminality. That is bad enough for the middle aged but how much more disastrous for those standing on the threshold of adult life, whose characters and disposition are in the moulding and whose traits may be passed on to a generation yet unborn.

The only solution to this economic and moral problem is work—the opportunity to earn the right to daily bread, clothing, shelter and amusement, and if industry is presently unable to provide this right it becomes a challenge to the governments of the country to do so, until such time as conditions make it possible for industry to adjust itself, and in this connection the term "industry" is used in its broadest sense, to include agriculture as well.

To date various devices have been tried and found wanting in greater or less degree. They have not made any substantial dent in the relief roll in the west. The farm bonus plan, the housing act, the home improvement act, the federal-provincial youth training scheme and others might be cited. At best, none of them have proved more than seasonal or temporary, very temporary, palliatives. Insofar as the prairie provinces are concerned, none of them have enabled a large body of unemployed young people to embark on a life vocation and it is doubtful if any of them have, to any appreciable degree, enabled any to make adequate preparation to take advantage of opportunities which industry may be able to afford them in the future, when general economic and agricultural conditions shall improve.

### Immediate Needs

If direct relief on a substantial scale, including the able-bodied as beneficiaries, is to become a permanent policy, it is necessary that it be provided through governmental agencies for those who are physically fit and qualified to undertake it, and if adequate and practical training is not to be furnished to youth to enable them, when opportunity arises later, to fit themselves into the industrial life of the country, then, indeed, is the outlook gloomy.

And in connection with training courses for youth it is worthy of note that the Saskatchewan Education Commission in Regina recently issued a condemned youth training course as inadequate, impractical and wasteful of money. It was contended that the courses are too short to be of any value, that instructors had only theoretical knowledge and that youths, when the courses were completed, were not only unfit to undertake practical work but that their efforts to engage in business on their own account spelled failure for themselves and injury to the established trade. They had previously recommended adoption of the apprenticeship system, such as is found successful in Great Britain and Denmark, without avail.

Opinion in the west that, for the qualified, work should be substituted for direct relief is well crystallized and the belief that training of youth for future endeavor should be practical and adequate is well established. Only persistent and concerted pressure by the people of the west on their governments will result in these important and absolutely essential objectives being achieved.

### One Way To Collect

Druggist Walter Blev of Peckville, Pa., is giving a one per cent. rebate on all purchases—but not to the customers. He asks them to write on a form the name of the church they attend. Then he enters the amount of the purchase. At intervals he sends checks to their pastors.

Russia now has 250 farm theatres

## Nervous? Headaches?

**WOMEN** who are nervous, weak, or have headaches or indigestion may need Dr. Williams' Pink Pills. It cures the blood, builds the system, and gives the nerves a rest.

Dr. Williams' Pink Pills for Pale People. It cures the blood, builds the system, and gives the nerves a rest. It is the only medicine that cures the blood, builds the system, and gives the nerves a rest. It is the only medicine that cures the blood, builds the system, and gives the nerves a rest.

### Was Special Kind

Two Scotsmen happened to meet in the street. One was carrying a parcel, and was asked by the other what it was.

"Oh, it's some ham," was the reply. "I always buy ham at Sunday's store."

The other thought she would try some ham, and off she went to Sunday's store.

"I want some ham," she said. "What kind?" asked the shopkeeper.

"Oh, the same as Mrs. Macdonald gets."

The shopkeeper smiled, and leaning confidently over the counter, asked: "What's yer bottle?"

Children who get a good deal of sunshine have less dental decay than children who live where there is meagre sunlight, judging by a study of 94,000 boys.

The first crescent-shaped roll was made in Hungary 350 years ago to celebrate a victory over the Turks. Recently Hungary created a monument to the roll.

## Consumption Of Eggs

Says Statistics Have Over Estimated Number Of Eggs Consumed In Canada

Statistics by a peculiar error, have been over-estimating Canada's egg consumption. W. A. Landreth, of Winnipeg, president of the Canadian Produce Association, disclosed at Montreal.

Their estimates have been based on the assumption that roosters as well as hens are among Canada's egg producers. Mr. Landreth told delegates to the association's annual convention.

For some years, the per capita consumption of eggs was quoted in Canadian statistics as approximately 30 dozen, or an egg a day which was far in excess of any other area of the world," Mr. Landreth said.

"During recent years this has been adjusted to approximately 24 dozen, about two-thirds of an egg a day."

"We understand that the former quotation was based on the theory that egg production was not limited to pullets and hens, but that all chickens and cockerels performed a similar minor duty."

Earlier, Mr. Landreth asserted that failure of the organization to keep Canadian farmers clear of burdensome supplies of butter, eggs and poultry meats had resulted in millions of dollars loss to the industry. He urged more reasoned production.

Canada's food supplies will constitute a trump card in the future, said Hon. Bonas Dussault, Quebec minister of agriculture, told the delegates.

## Not Just A Story

The New York Times says many Americans whose grandfathers were born in Ireland have heard these elders speak of the Night of the Big Wind.

As some of the ancestors referred to it at the date of their birth the youngsters may have regarded it as a bit of a frivolous anecdote of fact. But there was such a night; this year was the centenary of it. It began about 11 o'clock on the night of January 6, 1839, and continued until after daylight the next morning.

Limerick and the Dublin neighborhood suffered heavily. Two hundred houses were blown down and as many more were burned. Twenty persons were killed in these catastrophes and 100 were drowned.

The coast of Ireland and western England were lined with wrecked ships. The Big Wind in its general effect, but on a smaller scale, resembled our own winter of 1918-19.

As Ireland did not keep vital statistics until 1860, the Night of the Big Wind was used as the basis of many claims made under the old-age pension act 30 years ago.

## Antarctic Expedition

Lincoln Ellsworth Claims U.S. Polar Territory For U.S.

Lincoln Ellsworth, explorer of the 450,000 square miles of South Polar territory for the United States when he returned from an Antarctic expedition aboard his base ship *Wasp*, said:

Ellsworth's new claim expanded the territory of the United States in the region recently won by the U.S. In a radio message from the Antarctic in January he said he was claiming "80,000 square miles of country never seen before by the human eye" as the result of his aerial exploration.

## Liked His First Movie

Man aged 103 Would Be Willing To See Another Show

When his friends related that he should see his first moving picture, Jacob Nabel, 103, said he wanted to be paid if he were to sit through a film.

"But I was wrong," he admitted after seeing a technician production. "It was so good I would be willing to see another."

Nabel, an Hungarian-born proprietor of a clothing store in Cleveland, never had ridden in an automobile or seen a show.

## Outfit Is Expensive

Clothes Of New Judge For King's Bench Cost About \$2,500

When a new judge for the King's Bench in England is appointed it costs the judge about \$2,500 for his new rig. The outfit includes robes of scarlet, of black and of violet; thick robes for the winter and thin ones for the summer; waistcoats with ermine and silk; ruffles, scarfs, garters, gloves and silk stockings. Besides, there must be a velvet velvet coat, with sword, and a full-bottomed wig, which alone costs \$100.

If permitted to grow, corn suckers add materially to the yield of grain and fosterage.

## USES BOTH HANDS TO WRITE

### Letter From A Man of 90

He asks us to excuse his writing. He is more than 90 years old. He is a grateful man for being able to write at all his age, especially as he has been suffering from rheumatism. This is what he says in his letter:

"Three years ago I was in bed for six weeks with inflammatory rheumatism. I took Kruschen salts and have not had another attack. But the complaint left me with inflamed feet, and it hurt me to walk. My hands were stiff and I could not write. I renewed every morning before breakfast, and after three years, because I am sure they have kept me in good health for three years, I renewed health and vigor is the result."

The pain and stiffness of rheumatism are often caused by uric acid in the muscles and joints. Kruschen salts dissolve and remove uric acid in a gentle way through the action of the kidneys. Renewed health and vigor is the result.

## Sawdust For Fuel

Homes In British Columbia Heated With Wood Product

Sawdust is now used in heating more than 15,000 homes and other buildings in British Columbia. It comes about since combustion engineers, in co-operation with the forest products laboratories of the Canadian Department of Mines and Resources, devised methods of using sawdust for fuel.

Formerly regarded as unavoidable waste, sawdust is now used in heating more than 15,000 homes and other buildings in British Columbia. It comes about since combustion engineers, in co-operation with the forest products laboratories of the Canadian Department of Mines and Resources, devised methods of using sawdust for fuel.

## Has Not Forgotten

Sir Aba Bailey Cures Out Wishes Of His Father

With a characteristic gesture Sir Aba Bailey has given a scholarship of \$300 a year to commemorate the centenary of the great battle of the Cape into the hinterland of South Africa. He has left the question of its disposal in the hands of a committee. "I am an Afrikaner," he says, "with many Dutch relations and never forgetting that almost the last words of my father to me were 'Be kind to the Dutch; I owe everything to them.'" Sir Aba has been a pioneer for nearly 60 years in many parts of South Africa.

The invention of a machine that takes seeds to fill no great need at the moment. What this country needs is a machine that can cook, make beds, and is a pleasant companion—without talking.

Paris has a new museum of Man, containing exhibits of various races and their customs, and also maintaining laboratories for research work.

A deer ordinarily sheds its antlers during the breeding season.

## Poland Is Rich Country

Is Determined To Keep Her Independence If Possible

Poland has had a ghastly history of demerit and endurance under centuries of tyranny. She resists the desire for independence after the Great War, and she is determined never to lose it again if she can possibly defy those who would seek her wealth.

For Poland, it should be borne in mind, is one of the richest countries in the world, despite the temporary poverty of part of her agricultural population, which is due solely to economic conditions. She exports more timber and wood products than any other European nation, and her vast agricultural area floods the European markets with cheap bacon and eggs. She is the third country in the world, after Russia and Germany, in the production of potatoes and of rye, and the second in the production of hemp and flax. She is the fourth country in Europe in coal production. Her coal mines moreover, are a complete unit, formerly divided up by artificial deceptions between three Powers—Russia, Austria and Germany.

Moreover, Poland is a country producing colossal amounts of potassium salts. Her salt mines are estimated to contain 6,000,000,000 tons of salt, sufficient to supply the world's needs for centuries. In her mineral resources she is no less wealthy, with huge iron ore and zinc mines, and she is also the only country in Europe with the exception of Russia and Rumania, which possesses important deposits of crude oil and natural gas.

It is any wonder, with such a heritage, and with such wealth, that Poland seeks peace and refuses to be beguiled or cajoled into any close league with any other nation or nations from whom she has suffered so cruelly in the past? She has endured centuries of terror. No nation in the world knows better what the domination of ruthless neighbors means. But the soul of Poland has never been crushed, and to-day the Polish is unit against any form of outside aggression—Montreal Star.

## Air Line Fares

Standard Passenger Rates To Be Ten Cents A Mile

Standard passenger fares between points on the Trans-Canada Air Lines will be 10 cents a mile, according to a notice in the Canada Gazette.

In calculating fares, the notice actually figures show a fraction of five cents or more than two and one-half cents, such fraction will be considered as five cents. If a fraction of two and one-half cents is shown the fraction will be dropped.

T.C.A. plan to begin passenger flights next April 1.

The planet Uranus was credited with six moons for half a century; it actually has four moons.

More than 10,000 farmers participated in Russia's recent cross-country contests.

Football players have been known to lose 30 pounds in a single game.

## NIGHT COUGHING CAN OFTEN BE PREVENTED

If you suffer from a cough at night because of even a slight cold—do not neglect it. It may develop into a chronic cough. Buy a bottle of Vicks VapoRub and use it. It will soothe the throat and loosen the phlegm, and thus prevent the cough from becoming a habit. It is a family remedy for all kinds of colds and coughs.

## Lord Nuffield's Benefaction

Some Citizens Made In Reference To Purchase Of Iron Lungs

Several London authorities have stepped forward to challenge the suggestion of Sir Frederick Mottet that Lord Nuffield's proposed purchase of 1,000 "iron lungs" for Empire hospitals is a vast waste of private benefactions.

Sir Frederick, medical officer of health for the County of County Council, attacked the motor magnate's proposal on the ground the mechanical respirator was in process of evolution at the University of Oxford replied in the same journal, denying Sir Frederick's implication the particular type of respirator had been suggested by Lord Nuffield.

Dr. Macintosh said Lord Nuffield saw a motion picture of "iron lungs" and then learned the question of expense prevented their wider distribution. He then asked: "If many hospitals throughout the Empire were to have one, is there a reasonable prospect of lives being saved?" Dr. Macintosh told him there was, and Lord Nuffield said:

"Well, I'll give instructions at once for 1,000 to be made."

Dr. Macintosh said improvements in design of "lungs" by the Medical Research Council already had been incorporated in those being made for Lord Nuffield.

# Management Of The Farm Very Different From That Of A Few Decades Ago

The management of a farm as a business at the present time is quite different from that of only a few decades ago. The chief problem in earlier years was to produce the farm produced a sufficient quantity of the various essential commodities required by the farmer. This also comparatively little was then purchased. Clothing and furniture were frequently made on the farm. The bread, fruit and vegetables were home-produced products. Entertainment was provided by members of the community through concerts, dances, bees and parties of various kinds. Taxes were paid in part by means of statute labor. For many communities the home provided the fastest means of transport. In such communities, money was not so much required to carry on the business of farming and to establish a living standard.

Nowadays, entirely new conditions must be faced by the farmer in conducting his business. He uses more and improved machinery which must be purchased. In place of statute labor he now pays higher taxes in cash due to improved and extended services. Much of the transportation work is done by motor trucks, in some cases owned by others, in place of his own horses. This also means for in cash. Much of his draft and belt work is done by gasoline tractors which require fuel not produced on the farm. The use of machinery, purchased with cash, in his family mode of living, changes have come to improve his lot through the use of radio. He now buys a greater proportion of food, clothing and entertainment than in former times. Community services have become more readily available. These may be as highly desirable, but they also mean he must provide either cash or credit. Farming conditions of the present necessitate that he equip himself with more cash than has ever been required previously. While it is recognized that more cash is required by farmers than formerly, it must be conceded that new means of securing that cash have become available.

Every farmer operates his business on a basis of a plan of one kind or another. During recent years, farming has been gradually changing from a self-sufficing to a commercial agriculture which requires the introduction of farm planning suited to the new conditions. Successful commercial farming demands more detail in the plan to the point that for most farm operators, the old mental plan should be superseded by one which is carefully thought out and written. The required revenue does not come automatically; "carefully planned plans need to be made where by it may be secured."

The farm budget or financial plan is the anticipated plan for the coming year is being more generally used by progressive farmers. A financial plan of the business may be made by preparing a list of items of farm expenses, including overhead expenses, with estimated amounts of each. The total of the estimated farm expenses is calculated. The problem then is to figure on estimated revenue sufficient to equal or exceed the estimated expense. Farm accounts are particularly helpful in preparing the budget. Farmers can obtain forms which will be useful for this purpose by writing to the Economic Division, Marketing Service, Dominion Department of Agriculture, Ottawa.

## Their Own Worst Foes

Groups Of Irishmen Have Again Delayed Chances For Peace

Always the foes of the Irish are the Irish. History repeats itself in the cowardly argument by dynamite by the rabid nationalists in fire. Even with more than home rule the Irish continue grievances started many years back in the past. The Irish "cause" has ever reached a point where peace and harmony was in sight when it was shattered by groups of daftly nationalist who accomplish deeds disloyal to their fellow Irishmen. The latest violence attributed to the Irish Republican Army are the most deplorable yet. They have shamed their fellow-countrymen and have caused a rise to lose the sympathy of friendly nations as well as neighbors. The chief of unity has been shattered. History has repeated itself in shame and outrage upon innocent people—Brandon Sun.

It is probable that no bird that ever inhabited the earth was capable of chewing its food, although some prehistoric birds had teeth.

WHERE RUSSO-JAPANESE CLASH MAY START

Military experts in the East contend that the world has not heard the end of Changchun Hill, where recently Soviet and Japanese soldiers clashed. This particular vantage point is held by the Russian troops and commands Kishin, where Japan lands supplies for her troops in North China. Several skirmishes have occurred in the area recently, and another may be the spark which will start a world war.

## History Of The Arctic

R.C.M.P. Museum At Regina Has Interesting Old Documents

Something of the history of the great Arctic is wrapped up in a tattered document now in the Royal Canadian Mounted Police museum at Regina barracks.

The document is in the handwriting of Captain Sir P. J. McClinton, British navigator, who sailed into the North West passage about 1859 in search of the Franklin expedition.

The document was found in a tin canister by Corporal W. Dodsworth at Port Ross, Somerset Island, Eastern Arctic, North West Territories. Corporal Dodsworth sailed into the Arctic in 1920, and he found the tin canister near a spot where a cairn was built by the British.

The date of the document in McClinton's hand is "Port Kennedy," July 22, 1859.

The document was no dried that there was great danger of spoiling it if it was handled by any expert. It was forwarded to the R.C.M.P. headquarters at Ottawa and subsequently to the department of public archives officers of which sent it to the public record office in England to have it properly treated.

Officials of the British museum found the document authentic and returned it to Ottawa. R.C.M.P. subsequently forwarded it to the museum at Regina headquarters and gave a photostat copy to the public archives.

## To Tour Canada

German Journalist Will Gather Material On Empire Problems

First assistant of Dr. Kurt von Stutterheim, who became a member of the staff of the Deutsche Allgemeine Zeitung when it recently absorbed his old paper, the Berliner Tageblatt, is to tour Canada and other Dominion gathering material for a series on Empire problems.

Dr. von Stutterheim, dean of German universities in London, is well known with a reputation for sympathetic interpretation of the British viewpoint, in place to spend May in Canada. He will also be in the Dominion of New Zealand and Australia.

He first came to England in 1922 and soon after married a sister of Mrs. Anthony Eden. His latest book is "Germany."

Fine, delicate furniture should not be kept near windows, radiators or any place where sudden changes in humidity and temperature occur.

## Explanation Is Simple

Public Health Authority Tells How Girls Resist Cold And Heat

Light has been shed on a question that never ceases to puzzle men—how women can wear in bare necks clothing in winter and winter-like clothing in summer and still escape from any by a public health investigation at the Yale University School of Medicine to the Society of Heating and Ventilating Engineers.

It appears, upon the testimony of this gentleman, that the reason why women can move about in bare necks and still retain such a fresh appearance in mid-summer's heat when men are dripping with perspiration and wear collars from the excessive humidity.

So now we know the reason for it. The girls' skin is more elastic and air-conditioned in accordance with modern practice, are also insulated. Brookville Recorder and Times.

## Valuable Lumber Property

Large Sum Paid For Land In The Mayfair District

Nearly \$500,000 has just been paid for properties having an area of more than an acre in Curzon street, Mayfair. The transaction forestallings sweeping changes.

Already begun, the transformation of Curzon street from a fashionable to a business quarter will be accelerated. No 20, one of houses about to be pulled down, was where Dr. Johnson's friend, Elizabeth Carter, translator of Epictetus, lived. Madame Vestris, the famous actress and wife of Charles Mathews, the younger, lived at No. 1, but the house was not the same as that now bearing the name of Charles Redd read at No. 67.

Smollett had a "humble lodging" in the same street and if tenants of houses not actually within the present transaction were to be named the list would be long, with special mention of Lord Beaconsfield, who bought the lease of No. 19 out of the profits of "Endymion," and died there in 1861.—London Times.

The three things that cause the most misery to most people are war, poverty and poor public speakers.

## Alert Pets In Colorful Cross Stitch

Household Arts by Alice Brooks

They're 8-10-inch-long Cross Stitch and Other Easy Stitches

Cute as can be and they'll look in your cat when you see them done in black and grey, or in two shades of grey or brown with the flowers adding bright touches. The 8-10-inch cross stitch work up quickly. Pattern 6273 contains a transfer pattern of 11 motifs ranging in size from 1 1/2 x 2 1/2 inches to 8 x 10 inches. A collection of all sizes, from 1 1/2 x 2 1/2 inches to 8 x 10 inches, is available. This pattern set 20 cents in coin (stamp cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McEwen Ave. E. Winnipeg. There is no Alice Brooks pattern book published.

# Research Workers Seeking To Discover New Uses For Agricultural Products

## Story Of Human Progress

In Struggle And Sacrifice Of Courageous Leaders

One Behrener, an English writer best known for her sensitive stories about South Africa, described a dream. She saw two river banks divided by a deep and wide chasm. One side was crowded with poor and unhappy people. The other side was bright, spacious and prosperous. The people wanted to cross over to the better side, but between them lay the wide gorge. And there was no bridge by which to cross over. Suddenly there was a movement among the people, leaders stepped forward and led a march toward the chasm. The people came to it, one by one in front. In others took their places. These fell in, also, but the unending stream of marchers continued. For many years this went on, until finally the chasm was filled in. Now the people could walk across the chasm over to the bright side. A bridge was made for them out of the bones of those who lay the way.

This is the story of human progress. It is the story of human liberty and democracy. Many of the benefits enjoyed to-day have been secured by the struggles and sacrifices of courageous leaders in the past.

Scenes of the past, casually across the bridges that were built by the lives of such men and women. Scores of names are known to be known by many names have not been recorded. These are the bands who have freed the world from black slaves. The men and women who helped to rescue little children from grinding toil and unwholesome food.

Men and women of science who spent their lives to free mankind from disease. Men and women who helped the public understand by which the minds of the common people may be freed from ignorance. Those who helped to humanize the treatment of the insane and of prisoners, who helped to secure manhood for the unborn without sacrifice. All the trade union movement, who helped to secure social legislation and labor laws, which protect and aid human life, have built the bridges to human progress. This has been done slowly and painfully. Every inch of the way is marked with sacrifice. All that has been gained should be guarded proudly and resolutely.—Toronto Star.

## Canada's Lily King

Manitoba Man Has Produced Some Of Finest In World

Growing in countless gardens throughout the world are the beautiful offspring of horticultural developments of one of Canada's most famous horticulturists—F. L. Skinner, of Drozmore, Manitoba. The Skinner family, and propagation grounds, are in a district with climatic conditions that one would not expect to be productive of many outstanding products in the flower world. The Drozmore is well to the north of Manitoba, just off the Saskatchewan border and near the northwest corner of the Riding Mountain, yet in the last decade or more, Skinner productions have won the highest recognition and gained a reputation for merit in many lands and many climates.

Mr. Skinner has gained much of his horticultural fame through the propagation of hybrid lilies. He has taken the plain little native lilies, whose hardiness is unquestioned, and by crossing and re-crossing, selection and re-selection, he has produced flowers of the lily realm.

Another garden subject to which Mr. Skinner has been giving attention is the production of extremely hardy varieties for northern areas, is the Lilac. He has placed in commerce a hybrid Lilac that is distinctly new in their deep rose coloring.

## Showed Slight Increase

Immigration To Canada Higher Last Year Than In 1927

Immigration into Canada in 1928 increased to 17,244 persons from 15,111 in 1927. Mr. McKinnis, secretary of the calendar year issued by the immigration branch. The percentage of increase was 14.5. There were 2,389 immigrants from the British Isles, an increase of 18.2 per cent; 5,833 from the United States, an increase of 12.2 per cent; 1,212 from the northern European areas, a 14.7 per cent increase, and 6,710 from the southern European areas, an increase of 24.1 per cent. There were 57 Japanese admitted.

Numbers of immigrants entering Canada dropped from 104,806 in 1920 to 17,244 in 1928.

The national chemurgic committee of the Canadian Chamber of Commerce, appeared at a special survey to develop new and expanded markets for Canada's farm products. The committee is to make a "complete picture" of the agricultural situation in the Dominion to enable it to plan the future of the industry.

The committee asked the Canadian society of technical agriculturists to undertake a survey of the application of research in the agricultural field and requested the chamber of commerce to make a similar survey. The national department of agriculture were invited to make an international survey of the chemurgic activities in other countries.

D. G. McKinnis of Winnipeg, committee chairman, said he hoped reports on the surveys would be available within a few weeks.

Mr. McKinnis, vice-president of United Grain Growers, Limited, and a former minister of agriculture in Manitoba, was appointed chairman of the committee. When it was established last November at an agricultural forum of the chamber of commerce in Toronto, it was to find new edible and inedible uses for farm products.

Discussing results of the private meeting, Mr. McKinnis stressed necessity for co-operation between agriculturists and their industrial utilities. He pointed out that 400 patents available to the national research council had been taken up, indicating "research is going ahead."

The committee decided to make a compilation of what industrial products have been produced from agriculture and to determine on what products further research could be applied.

Disability of further conferences between industrialists and research chemurgists was emphasized at the meeting with a view to interpreting to industry facts already disclosed by research.

Twenty-five members of the 26-man committee, representative of the agricultural, scientific and industrial fields, attended the meeting. The hold since the body was established. An executive sub-committee was appointed to continue the program with Mr. McKinnis as chairman.

## Seekers Of Solitude

Number Of Hermits Are On The Increase In Great Britain

That the number of hermits is on the increase in Great Britain is revealed by the number of islands sold lately by London auctioneers. Some of the islands sold were for a tiny lake and live themselves away amid idyllic solitude for 12 months every year. Amid misty glens and grassy slopes they dwell in peace. Most of the islands are about 100 acres.

John Morris, who owns an island off the west coast of England, is trying to form an Association of Island Owners. Apart from the big islands like Arun or Lundy, there are scores of others round Britain's shores which are constantly changing hands, as one owner vacates of solitude and another wants to try it on.

Many islands sell for \$5 or \$10 an acre. The most over paid was about \$500,000.—Quebec Chronicle-Telegraph.

## Should Use All Resources

Before Ceasing Efforts To Rescue Drowning Or Gas Victims

Apparently so lifeless that a coroner's jury returned a verdict of death by carbon monoxide in London, O.T. recovered after firemen had worked for an hour with an oxygen inhalator and prone pressure resuscitation. It doesn't do to consider gas or drowning victims as dead until a competent resuscitator has exhausted all its resources in attempting to revive them, and lives are being saved every day by such means.

## One Or The Other

"Henry," said according to a report, "I must give you credit for one thing. In all our married life you have never spent a cent of money on a 'No Nonsense' agreement the artist friend."

"What I am wondering," added his wife, "is whether to give you credit for a lovely disposition or mere lack of courage."

By driving the average automobile continuously at 60 miles an hour you can use 100 gallons of oil as you would use it for 30 miles an hour.

## POPE PIUS DIES PEACEFULLY AT THE AGE OF 81

Vatican City.—Pope Pius XI, 81st head of the Roman Catholic church, died at the age of 81.

The pontiff died with his nephew, Count Franco Ratti, a few cardinals, prelates, Dr. Miani and Dr. Filippo Rocchi, and two male nurses at the bedside.

Most were on their knees praying when Dr. Miani announced the holy father had breathed his last.

Cardinal Eugenio Pacelli, camerlengo or interim ruler of the church, made the official pronouncement of death, with the traditional rite.

Wearing his violet mozetta and mantelletta or mantle, as is the pope's dress, he approached the bier and drew back the white veil that now covered the dead pontiff's face.

Flickers of light from dozens of wax candles fell on the aged countenance.

The thin, scholarly, azele looking cardinal, who had worked with the pope for many years, called out the Christian name "Achilleus" in a voice shaken with emotion.

The small sound echoed from the tomb and no answer came.

Into the room throbbed the tolling of bells from Rome's 400 churches for morning Angles. Still no answer.

"The pope," said Cardinal Pacelli, "is truly dead."

Francisco Cardinal Marchetti-Selvaggini, the pope's vicar for the Rome diocese, immediately began to say mass for the dead pontiff.

Monseigneur Alberto Sordani, head of the apostolic briefs, soon began drawing up the official notarial act of death to be signed by Cardinal Pacelli and the other cardinals.

Cardinal Pacelli, as papal secretary of state, withdrew to his office to start his staff routine in the diplomatic corps attached to the holy see as well as calling to papal representatives abroad.

(Rodrigue Cardinal Villeneuve, head of the Roman Catholic hierarchy in Canada and a party of Canadian prelates have been visiting in Italy recently in connection with the anniversary of the foundation of Canadian college in Vatican City.)

It was presumed various cardinals abroad would leave by the fastest means in order to arrive in Rome for the conclave which should start within 15 or 18 days at the latest to elect a new pope. The cardinals were expected to fix the date for election of a new pope Feb. 28.

The funeral will be held in St. Peter's probably the afternoon of Feb. 15. Burial, according to the pope's own desire, will be in the tomb of his two immediate predecessors and only a few yards from the tomb of St. Peter.

**Provision For The Press**

Newspapers Will Ride Train Ahead Of Royal Coaches Across Canada

Ottawa.—A pilot train to accommodate newspaper men and women and press photographers will be run ahead of the royal train which will carry the King and Queen on their trip across Canada. Prime Minister Mackenzie King announced in a statement issued recently.

"Special provision," the statement said, "will, of course, be given to Canadian journalists but, as far as possible arrangements will also be made to care for newspaper and press men from other countries."

The United Kingdom and from other parts of the British Empire and from the United States. As it will not be possible to provide for more than a certain number, applications, in order to receive consideration, should reach Ottawa as soon as possible.

**Seizure of Banknotes Held**

Montreal.—Breakfast taken with a face value of \$750,000 were seized by Quebec provincial police, who declared they were tracing a huge ring of distributors in Montreal and district.

**Experimental Flights**

London.—The British government hopes to make experimental flights over the south Atlantic before the end of the present year. Captain Harold Gifford, under-secretary for air, told the House of Commons.

**Recognition For Toronto Medals**

London.—Dr. Neil Baird McGilivray and Dr. Oswald McKillop Ross, both of Toronto, were admitted to membership in the Royal College of Physicians.

## To Rescue Britishers

**Japan Postpone Attack On Town To Permit For Evacuation**

Shanghai.—A British diplomatic request and inability to establish communication with 37 British and 24 Chinese foreigners at Kuling caused Japanese army officers to postpone a long-announced attack on the resort town.

The officers agreed to extend the time limit for evacuation of Kuling, where the foreigners have been stranded since last summer, but it was emphasized "no commitments regarding possible military operations in the future should be made."

The foreigners have been surrounded by Japanese soldiers besieging 4,000 Chinese guerrillas entrenched on Lushan, the mountain on which Kuling is perched. The Japanese warned foreign consuls Feb. 2 of the planned assault.

British authorities, meanwhile, obtained release of two British vessels, the *Minerva* and the *Tatjana*, of the Indo-China Steam Navigation Company, detained for seven hours off the coast of China.

Shipping circles felt apprehension concerning Japanese interference with Japanese naval officers declared:

"The Japanese navy will continue to inquire into the ownership and status of the Chinese ships. It is not, however, deemed suspicious. Unless the required documents are available, the ships into a ship status may require three days to six months."

**Special Delivery Letters**

**Announcement That Reduction Will Be Made From 20 Cents To 10 Cents**

Ottawa.—A special delivery service at half the present cost will be inaugurated March 1, Hon. Norbert McPherson, postmaster-general, announced.

The fee will be reduced from 20 cents to 10 cents. In addition to the regular postage, and a staff of uniformed postal messengers will be appointed.

Postal officials believe the reduction will eliminate the inconvenience because of the difference in United States and Canadian rates. The reduction into a ship status may require three days to six months."

At present officials find Canadians are often called upon to pay 10 cents for special delivery letters from the United States bearing only one U.S. special delivery stamp.

The new service will start on the same day the air mail service goes on an overnight scheduled basis between Montreal and Vancouver, enabling the public to take advantage of immediate delivery of letters on arrival at their destination as well as of the faster service provided by air mail.

Mr. McPherson announced the new postal messengers will be employed by the year, instead of at a casual rate, much as letter carriers at present. They will be under the civil service commission and will be in line for promotion in the service.

**Milk Survey**

**Says The Unkilled Laborer Drinks The Lowest Quantity Of Milk**

Calgary.—Dr. F. J. Booth, Ottawa, associate director of the federal dairy service branch, told the producers' section of the Alberta Dairy men's Association that the unskilled laborer drinks the lowest quantity of milk.

He displayed charts of a survey of 3,213 families in Canada showing child consumption of milk increased in ratio to income. Children of relief families were in the low bracket. Adult consumption is the reverse, he said.

Dr. Booth said the actual per capita consumption was 74 of a pint a day. Farmers drank the most milk, as did professional men. The unskilled laborer, the "man who possibly needs it the most," the lowest.

**Planes Directed Rescue**

Moscow.—Five planes were used in attempts to rescue 100 collective fishermen adrift on an ice floe in the Caspian sea. The planes directed the work of rescue boats and dropped food to the fishermen, camped on ice of shore and stranded when it broke loose and drifted to sea.

**Made His Own Money**

Kirkland Lake, Ont.—Out of work, a man set himself up in electro-plating equipment and dies and turned out counterfeit coins. Arrested, he pleaded he did not pass any of the money. He was sentenced to one year.

**Italian Soldiers Killed**

Rome.—Seventy Italian soldiers and workers lost their lives in Ethiopia during January. Three officers and a police agent were killed in clashes with natives and 75 soldiers and workers died from accidents or disease.

## Transferred To Ottawa

**Promotion For R.C.M.P. Inspector C. H. Gray Of Saskatoon**

Saskatoon.—Inspector C. H. Gray, officer commanding the Saskatoon sub-division of the Royal Canadian Mounted Police, announced the transfer of Inspector Joseph Howe from here to Ottawa.

Sergeant J. H. A. Gilbert was placed in charge of the Saskatoon detachment, which position was held by Inspector Howe before his recent promotion from the rank of an acting sergeant.

**WANT FOREIGN TROOPS IN SPAIN TO WITHDRAW**

Paris.—A British-French plan to get Germany and Italy out of Spain by the use of Non-Combatant warships, help with peace-time crews was reported by informed quarters.

Diplomatic circles said Great Britain and France had offered to assist reconstruction of the war-torn country in return for a promise by the Spanish government that Spain would be kept purely Spanish.

Of more immediate concern to London was the situation in the Balearic Islands, the only one of the western-Mediterranean Balearic islands still held by Spanish government forces.

The British and French governments apparently were concerned lest Italian troops and Italian planes now occupying the neighboring, insurgent-held island of Mallorca should seek to invade Minorca.

French Senator Louis Berard, semi-official French envoy to the insurgent capital, was said to have informed sources that he had brought back from Burgos an insurgent demand for legal recognition of General Franco's government.

Bound up with this was a demand for return to the insurgents of gold belonging to the Bank of Spain deposited in France by the Spanish government, as well as Spanish art treasures which the government shipped to France for protection.

Berard was said to have brought Bonnet five specific insurgent grievances which they hoped would make immediate recognition possible. These were listed as:

1. No foreign troops would be allowed to approach French frontiers.

2. No foreign troops would be allowed to remain in Spain proper, the Spanish colonies or the Balearic Islands after military operations of the civil war are finished.

3. An expeditionary force of 10,000 men now ready to sail for a conquest of the island of Minorca would be made up exclusively of Spaniards.

4. Spanish refugees now in France would be taken into insurgent Spain without conditions or reprisals.

5. A general amnesty would be proclaimed for all government refugees now in France except "criminal leaders."

**French Boats In Collision**

Lorient, France.—The 7,600-ton cruiser *Georges Leygues* and the destroyer *Le Fantasque*, 2,436 tons, collided in the harbor. Two men were reported killed in the crash, which did serious damage to both warships.

**MORE GERMAN REFUGEES REACH LONDON**

London.—The 7,600-ton cruiser *Georges Leygues* and the destroyer *Le Fantasque*, 2,436 tons, collided in the harbor. Two men were reported killed in the crash, which did serious damage to both warships.

## FOR NATIONAL DEFENCE

**Republican Army Would Bid Ireland Of British Troops**

Dublin.—The terroristic Irish Republican army, which the Irish government is seeking to crush by drastic legislation, sent a crusade printed warning to a London newspaper threatening further violence in its campaign to rid Northern and southern Ireland of British troops.

The warning, expressing jubilation because authorities of Northern Ireland had cancelled a scheduled visit of the Duke and Duchess of Kent, brother and sister-in-law of King George VI., said:

On behalf of the Derry battalion of the I.R.A., we have prevented royalty from our soil. The next will be English troops, and we will see to it that they are not in Ireland.

The warning, expressing jubilation because authorities of Northern Ireland had cancelled a scheduled visit of the Duke and Duchess of Kent, brother and sister-in-law of King George VI., said:

## LIVELY SCENES IN HOUSE DURING BREN GUN DEBATE

## Fastest On Record

But Aviator's Spectacular Dive Will Be Bettered by Experts

The record-making dive, attained by H. Lloyd Child, chief test pilot of the Curtiss Aeroplane Company, in a four-power dive of a Hawk pursuit plane at Buffalo Municipal Airport, was the navy and war departments limited at Washington, even less spectacular than can be expected from craft already in development but whose performance have been kept secret.

Child's breath-taking dive was made in one of 100 planes contracted for by France with permission of the American war department. At Washington, it was pointed out, in the matter of improvements the latest military planes made are two years or more ahead of those permitted to be exported.

Child's dive, launched at an altitude of 22,000 feet, was regarded by the cool, calm and efficient aviator as "just another job."

"The test was made in connection with the guarantee of the plane's capabilities," he explained. "It was to stunt."

With the nose of his trim ship straight toward the horizon, he gave the plane its head and neck, it down to the 4,000-foot level before he began to ease its terrific descent. "I didn't feel any particular effort," Child said. "I didn't have any time to figure out I was feeling. There were too many instruments to watch."

"I just sighted down through the machine gun sights and I knew I was going to travel faster than I ever did before. It was only a matter of seconds. I hit the ground speed of 9,000 feet. At 1,000 I kept easing out of the dive and leveled off at 2,000. I didn't pull out faster because we test pilots have to be careful about 'going black.'"

Going black is caused by losing up a plane too suddenly. The Hawk flew away from the brain, leaves a pilot helpless.

Just how fast Child dove never will be determined. The needle on the recording instrument in his plane went completely off the graph paper when 725 miles were reached.

The dive was made with the engine turning over at its normal rated speed in level flight of 2,500 revolutions a minute. This was accomplished through the variable-pitch propeller. The craft was equipped with machine guns and bomb racks to meet test requirements.

The greatest previously registered airplane speed was 410.65 miles an hour, set by Francesco Agello, of Italy over a three-kilometer course in level flight in October, 1931.

## Bar Against Orientals

Time May Come When It Will Be Problem For America

An "open door" for Oriental immigration to the United States is reported from Tokyo as a part of the price which Japan demands for keeping the door open for American trade with China.

At the moment this demand need not be taken seriously.

The time may come, though, when the United States, Canada and Latin America will have to take account of it.

The Japanese and Chinese deeply resent the restrictions placed on their migration to countries, whose people are free to come and live in China and Japan. They feel that the laws excluding them from the United States, for instance, stigmatize them as racially inferior to Americans. Their pride is hurt.

And that is not all. They covet the right to migrate to the comparatively sparsely populated countries in this hemisphere for another reason. They can find climate here that suit them. And they know, too, that by combining their own low standard of living with the high wages they can get rich quick.

China and Japan are not strong enough today to enforce their desire that their peoples be treated in other countries as they treat foreigners who knock at their gates, but it is too impossible that the day will come when a half billion Chinese and Japanese, armed and organized, will seriously challenge our right to choose whom we will allow to enter and remain in this country. Detroit Free Press

## Antlers And Horns

Antlers are quite different from horns. Horns have a bony core, grown onto the skull; when broken they bleed freely and never grow out again. Antlers grow on blood vessels, after attaining their growth, and each year drop off cleanly from the head.

Rubber has been put into 20,000 different articles by one factory.

Factories are busy in Finland, and tea are unemployed.

## Deserves A Kind Word

Snow Usually Considered Nuisance Is Life-Saver For Crops

Old-fashioned little girls and boys, thrilled at the first snowfall, used to borrow their mothers' flapping extracts to make "snow putting," perhaps it was not very hearty, but they were unconsciously performing a symbolic rite when they ate it. For it is snow that gives us our daily bread.

Out around Chicago they have been getting so much snow they don't know what to do with it. Here, too, we are having more, so just after spending a million or so to get rid of what we had, it is distressing to read of blocked traffic and whole communities cut off from communication. Disaster rides in these great storms that blanket more than half the nation. We stare out the window at new flakes falling on the white waste and feel so bereft with snow we never want to see it again. Yet we would be sorry if we didn't.

All over the country this winter's snow is making next summer's crops. Even now it is preserving the heat of the earth and protecting vegetation. It binds the hard together and prevents erosion. When spring comes it is in flinging patches like "lost rubber bands" that the soil is saturated. The fresh young roots reach down thirstily for the moisture. When the land is green, and every heart rejoices in the bounty to come, but by then people remember the life-giving snow only as good rainfall. So perhaps it is never too late to say a kind word for it. —New York Times

## U.S.-Alaska Highway

Route Across The Prairies Would Be Less Expensive

Saskatoon, especially, and Canada and the United States in general, would benefit from the proposed United States-Alaska highway lead across the prairies, J. H. Holmes, president of the Saskatoon branch of trade said in commenting on a new report from Winnipeg in which it is stated that support for the route has been growing steadily.

The proposal for such a road had much to commend it to the governments of the United States and Canada. Mr. Holmes said. To construct the road across the prairies was less costly than the coast road owing to topography of country traversed, he pointed out.

The most important factor in Mr. Holmes' opinion is the close connection the proposed prairie route would have with the Hudson Bay route. Being the closest important point to Churchill, Saskatoon could be maintained as a junction point for the trans-shipment of munitions, supplies of all kinds, grains and flour and countless commodities, the products of the industrial centers of the continent.

Mr. Holmes pointed out that rapid transport of the supplies for troops and military supplies through Churchill and a fast service to the North could be developed through the Orient and water and over the prairie route to Alaska for trans-shipment to many Pacific stations.

## Kept In Heated Cage

Emerald Humming Bird Owned By Man In Scotland

To keep alive the smallest bird in captivity, A. B. Anderson, of Dunfermline, Scotland, feeds it in an electricity heated cage and feeds it almost constantly. It is an emerald humming-bird, less than half an inch in length. Anderson presented the bird at the Scotland National Game Bird Show, gaining the trophy for the best bird in the show and a trophy for the best foreign bird. The bird lives in a cage where the temperature night and day is kept at 60 degrees. It is fed on honey, condensed milk, and selected baby food. If the bird were allowed to remain foodless for two hours in the day time it would die.

Mr. Watts: "How is the girl going on a recommendation to you?"

Mr. Spauld: "Oh, she's a perfect beauty. I left her in a straight things up before the minister called, and she never even dusted off the Bible."

Chamberlain's umbrella has become a household name. It is the Premier's umbrella. Among Canadian statesmen Sir John Macdonald was equally noted for his red tie.

The Hawaiian Islands, from 1778, the date of their discovery, until the latter part of the 19th century, were known as the Sandwich Islands.

Most of the known superstitions extant in the world today developed after the beginning of the Christian era.

The United States' biggest oil field is in East Texas.

## BRITISH WAR SECRETARY VISITS NEW ORDNANCE FACTORY

Mr. Horo-Belisha, British Secretary for War, travelled to Nottingham recently to inspect the Royal Ordnance Factory there. This new factory is busy producing new 3.7 anti-aircraft guns, and we see Mr. Belisha (right center) standing beside one of the anti-aircraft guns.

## Reaping Reward

Jewish Refugees Have Helped To Stimulate Business In Britain

Great Britain is beginning to feel the benefit of the brains and industry of the 17,000 alien-scientists and business executives included—whose have come to the Old Country since the Jewish pogrom began in Germany.

According to report, the refugees have already been instrumental in giving work to nearly 16,000 unemployed. Many new factories have been started in the distressed areas. Far-seen German Jews transferred hundreds of thousands of pounds to British banks long ago, and this money is now being used to bring to England industries which have so far been almost exclusively German, Austrian or Czech.—The London Star.

## New Vaccine Developed

Product Guards Against Trouble From Sleeping Sickness In Horses

An encephalomyelitis vaccine developed at the University of Saskatchewan by Dr. J. S. Fulton of the animal diseases department, is better than any other on the market and will be available in sufficient quantity for all of the province's needs this year. This information was given by Dean L. E. Kirk of the College of Agriculture, at the university, speaking to the delegates of the Saskatchewan Dairy Association at their final meeting at Saskatoon.

Dr. Fulton's product, the dean said, gave complete assurance against trouble from "sleeping sickness," the disease which played so much havoc with horses in Western Canada last year.

## Just An Old Belief

The prejudice does not shoot its quills at an enemy. The quills are quite loosely attached to its body and when the animal snags with its tail, some of the quills may be flipped, quite a distance.

The British Museum has acquired a collection of more than 14,000 ferns, said to be the most important private collection of these plants.

## Looking For Ancient City

Toronto University Professor Going To Hunt For High Priests

Stepping back into history one year for every mile he travels, Prof. T. J. Meek of the University of Toronto has accepted an invitation to dig for an ancient city in Iraq next year.

The ruins of the city at Tepe Gawra, where Prof. Meek will excavate, were already crumbling stone when Cleopatra was making eyes at Antony, and the Oriental scholar thinks they date back to 5000 B.C. "There is nothing so early as this in Egypt," he said. "It even predates Babylon and Nineveh, whose ruins are only 15 miles away."

The expedition Prof. Meek is to lead will be sponsored by the University of Pennsylvania Museum and the Baghdad school. Excavation on the spot has been going on for 10 years, and the debris of centuries has already been cleared away to a depth of 100 feet. The ruins are expected to give a picture of man's Neolithic period, about which almost nothing is known to-day.

"We'll leave late this year and be away about nine months," said Prof. Meek. "The site is in northern Iraq, out far from Kurdistan, so it won't mean digging in the midst of a blazing desert. We expected to find the earliest cities known to man."

## Borrowed From Canada

Roumania Aid Greece Revived Loan Just After World War

Roumania owes Canada \$28,969,720, borrowed shortly after the close of the Great War. Hon. Charles Dunning, minister of finance, told a question in commons. None of the principal has been paid.

Greece owes Canada \$9,374,148. This arises from an agreement in 1919 when Canada undertook to extend credits to Greece amounting to \$25,000,000, to facilitate the purchase of Canadian goods.

Accordians make more noise for their size than any other musical instrument.

Sheep with teeth plated with gold have started a gold hunt in Australia.

## Wild Rice Cultivation

Oldest Cereal Crop In Canada Comes From High Priests

The Indians afford in Canada the department of mines and resources reported it instructed officers of the branch in Manitoba, Saskatchewan and Alberta to survey the possibilities of the cultivation of wild rice by Indians.

Oldest cereal crop harvested in Canada, wild rice commands high prices on United States markets due to a reported shortage. According to information received by the department a band of Indians at Fort Alexander, reserve south of Lake Winnipeg succeeded in harvesting wild rice. They sold 20,000 pounds which brought them 18 to 25 cents a pound.

Fields near Lac du Bois, Manitoba, have been under lease to a commercial enterprise which has been successful in developing good rice harvests.

## Armament Program

Australia Extends Manufacture Of Munitions Supply

So great has been Australia's development of munitions supply that she is now nearing national self-sufficiency in munitions manufacture. The number of employees in munitions factories has been doubled in the last four years though the actual number employed is not revealed.

The expanded program provides for the production of all types of artillery ammunition, small arms ammunition, respirators, armoured vehicles, depth charges and filling for mines. Factories for the manufacture of naval cordite and cartridge cases have been completed and mobile anti-aircraft guns are in full production.

Manufacture of gun ammunition has been greatly extended and orders for munitions for other dominions have been undertaken.

There are 3,218,854 telephones in Germany, or five phones to every 100 persons.

There are dozens of species of fish capable of giving electric shocks.

## A Century-Old Plan

Tunnel Under The English Channel Again Being Urged

The French Government is being urged in the Chamber of Deputies to make fresh approaches to British authorities on the century-old project of a tunnel under the English Channel.

Marcel Boucher, deputy of the Vorges district, used military and economic arguments when urging construction of a land bridge between France and Britain, but the response in England has been cool.

Charles James Fox said Napoleon the idea of a tunnel with tunnel in 1802, and from that day to this British military authorities have opposed it. In 1881 shafts were sunk in both countries and headings were driven a mile from each coast but Lord Wolsey stressed military arguments against it and the project fell through.

Since then there have been many attempts made to revive the idea, including design featuring lighthouses out in the channel equipped to flood the tunnel in an emergency. In 1924 the Committee of Imperial Defence reported against the tunnel and in 1929 could find no advantages in its favor. During the days of the MacDonald Government a free vote in the House resulted in a narrow defeat for the tunnel.

With the Chamberlain Government an engagement in rearmament and Europe in such disturbed state, authorities may find the time inopportune to review the whole project. In addition British shipping, which might be injured by its construction, has been losing ground steadily since the Great War, and might demand subsidies for itself rather than fresh competition.

Even so the question of defending a tunnel—whether it is easier to protect tramp-ships or a tunnel entrance from enemy bombers. It seems to be no doubt, the tunnel will be dug some day. Strategic and economic arguments against the tunnel, which might demand the Panama Canal was delayed for years through financial failure. It is the French War, and might demand provoke both patriotic doubts and financial scepticism until it is built—and then, perhaps, everyone will think it should have been built years ago.

## Change in Uniform

Tummy Atkins May Be Wearing A Collar And Tie

Before Tommy Atkins may be sporting a soft collar and tie when he takes his best girl out walking.

New ceremonial uniforms will soon be introduced in which, it is understood, the old uncomfortable "button-up" collar will be discarded in favor of collar and tie. The Commission of Enquiry have worn collar and tie since just before the Great War but the privates and the Commission officers and the rank and file.

The war office has neither confirmed nor denied the innovation. It merely says certain changes will be announced when the 1939 army estimates are laid.

Service uniforms won't be affected. The so-called "walking out" uniforms of the soldiers' "Sunday best" designed to attract attention and recruits. Army men are wondering whether it will be more popular than the blue dress uniforms sanctioned at the time of the coronation, which were not very enthusiastically received.

Army authorities are still trying to evolve a serviceable field uniform. Khaki was a big step forward in making the soldier a less conspicuous target. The chief problem now is to get a lightweight, hand-wearing uniform to enable the soldier to carry out his duties efficiently without being weighed down with equipment.

For centuries soldiers have groused about their uniforms. The high-necked collar style has persisted although concessions to comfort have been made in other directions. The trend is the abolition of gaiters and introduction of slacks like those worn by skiers.

## Dressing Them Up

Surgical Supply Store Now Has Cellophane Cases For Skeletons

According to the Australian Press Bureau an enterprising Sydney surgical supply store made a cellophane case for six-foot skeleton. Now hanging in the window in its sealed package, the bones are kept clean and free from dust. "We find cellophane invaluable as a wrapping for skeletons," says the proprietor. "It not only keeps the bones clean, but we think they look more attractive wrapped this way."

Families in Rome with more than seven children will get their gas and electricity at cheaper rates.

## CROWD SURVEYS DAMAGE DONE BY ALLEGED IRISH AGITATORS

The scene of the mysterious explosion at the big hydro plant in Southwark, London, which rocked the area, but did little damage. The cause of the explosion was not known, but Scotland Yard officers are investigating. Several alleged Irish agitators were arrested in the riot. The bomb did little damage, as can be seen at the right, as the walls of the electricity works are bomb proof, although windows in buildings in the vicinity were shattered.

## Let Winter Make Ice Cream on Your Window Sill

## ICE CREAM POWDER

by Ruth Comfort Mitchell.

### CHAPTER I

"A girl and a greyhound were running in the dark. Not running away, not going anywhere; running in a sort of rounded square, running with a dejected delight in running in motion, in smooth and lovely speed."

In the morning there would be mountains above and beyond, belting them, but in the intimate dusk the hills had their brow, large and mild and kind, brooding the earth below them. Sometimes the girl looked up at them, but the dog kept her eyes on the dimmed, immediate foreground. There was a certain familiarity between them—both young, fleet, with thin, strong legs and flat flanks and excellent wind, and both of a bronze brindle-brown. There was, likewise, a kinship of spirit, or at least of deportment, for each was shy, secret, disdainful. Presently they stopped running and stood still, breathing deeply and happily, tired. The greyhound pressed delicately against the girl's knees and hid a long muzzle into a slender hanging hand.

"Lightning..." the girl said absently. "Lightning, dear..." She turned toward the one open eye of the field. "Come!"

The Santa Clara valley rolled out beneath them, twinkling and twinkling with lights, golden and crimson like a carnival, but just below them the windows of Denaville glowed gently. Denaville was not a town.

It had over a dozen residences generously spaced in a spacious landscape, with orchards and vineyards and gardens, stables and cack growing pools, which formed a sort of architectural chronology from the Great-grandmother Dana house, with its needless early-seventies sleeping porch and hall, down to that strange, modern container of Ardine La Motte Dana.

The girl and the greyhound halted before the pioneer house. It was narrow-chested, narrow-hipped, not too much as a calico wrapper or a boot-ack, behind its low picket fence and its cinnamon planks and china wares and candyfuff.

She opened the gate and went up the dim path and rang the strident bell and waited.

The great-grandmother opened the door herself. "Sairy! Lynn! I'm late for dinner now."

## "At Last I've Found Relief from Distressing HEAD COLDS"

You, too, will pay tribute to good old Menhaden and its quick results in relieving head colds, nasal catarrh and sinusitis. That last is the best before it becomes dangerous. Use Menhaden tonight. Insert a little of each nostril and inhale. You will feel the soothing antiseptic vapors of the healing fish rising up your nasal passages... relieve nasal congestion, nullify any influenza germs, clear those clogged breathing channels and help keep your head clear. It is the tubor or cure of Menhaden today. Use it tonight. Relief guaranteed or money back.

GIVE the family a special treat with the most tempting ice cream imaginable! It's cheap, simple to make and delightful to taste! Mix a package of Jell-O Ice Cream Powder (cost about 12¢) with a quart of half milk, half cream. Place the bowl inside on the refrigerator in freezing water. Stir a few times and Old Man Winter will finish the job! Jell-O's secret is in 5 delicious flavours. Try a package today! (1)

Lynn, at your age! I wonder at you!" "Not running away; running round and round in circles, the way I always do, Penny!" he chirped merrily. "Never getting anywhere." They went into the house and instantly there was a soft rustle and a muted exclamation and her mother was upon her, big and beautiful, sunnily amused.

"Darning!" she cried. "I know you couldn't have quilted how late it is! You've been out all right! The snow doesn't matter! You'll be down just as soon as you possibly can—in your sweet new dress." She kissed her. "Hurry, darling, run, Duncan!" This naughty child walked forward as she realized she hadn't a watch, but she'll be ready in two minutes!

A pallid youth who looked as if he might have been born in a dinner coat had come into the hall. "Sarah Lynn!" he said glumly.

She gave him a limp hand. "Hello, Duncan! I'll hurry, Mother. She ran upstairs.

Duncan followed Sarah Lynn onto the wide verandah, down the steps, onto the lawn. The greyhound came on to him in lovely leaps, then stopped in chill reserve at sight of Duncan, her ears flattening.

"You're always liked dogs," he said a trifle defiantly, "but I can't see this pooch very far. I've got a good Boston bull at home; regular dog."

"He came this way," she said, "but I'm not crazy about your hound but I am crazy about you, Sarah Lynn." His hand clasped her elbow, still down to her hand, cool, unresponsive. "No fooling!"

"Duncan please! Let's not begin that all over again."

"I'm going to begin it again and finish it, this time! Listen, Sarah Lynn: I've never wanted anything in all my life that I didn't get."

"Only because you can't have me. Ever since you were a baby you've cried for everything you wanted for—rattles and kiddy-cars and dolls and sleds and a pony and a car and a yacht. Now you think they're going to hand you—me. My mother, your mother. But they won't; they can't."

He laughed contentedly. "They don't know. You'll do it. You'll get it. Oh, I'm not going to rush you! I can play a waiting game. But just get it through your head that you belong to me."

Sarah Lynn thought he was rather pathetic with his fragility and his passion for his elegance, casting him self for the character of the conquering male.

She showed herself, not ungently, walked away, stood looking up at the stars. Suddenly a single planet streaked east from her to follow a shooting star. Flying star? Plane. Something she told herself, something she would fly away in the night.

Homecoming Danas always paid prompt respect to the matrilarch. Sally Ann Dana, constant traveler and occasional absentee, was never even stop to her casual upbraidings before she made her devoirs to the ancient head of her household.

"Mercy!" she said. "Not really? I have the feeling that I must dash over there—that she may be going any minute."

"No! No! She is quite marvelously well, our precious little pioneer!" she said.

Sally Ann Dana came near to her great-grandmother's place and stood still to appreciate it, but the narrow front door opened suddenly and the old woman popped out.

"Sally Ann! And here you are, after tripping the wide world over!" she chirped. "Come in! Sally Ann! My land! My third daughter! Molly's boy! Wallie's girl! And I know more'n that!" She peered up at her sharply.

"The traveler followed her into the tiny parlor parlor with its nautical-appointed carpet and its flowers framed on wall. Well, I dare say I am, Great-granny, and I dare say I am."

"Course you are. Every last one of us is, always. We have what folks call get-up-and-get. Just naturally up put out from wherever we're at. North, south, east, west, land or sea. Made that way, some say."

"Queer! There'll be pinky-white, blue-eyed babies, too-headed, till you are."

"The traveler followed her into the tiny parlor parlor with its nautical-appointed carpet and its flowers framed on wall. Well, I dare say I am, Great-granny, and I dare say I am."

"Course you are. Every last one of us is, always. We have what folks call get-up-and-get. Just naturally up put out from wherever we're at. North, south, east, west, land or sea. Made that way, some say."

## IT POURS CLEANLY

THE HANDY POURING SPOT for the two pound tin. It's free—write for one NOW

• Fits the special top of the 2 lb. tin of Crown Brand Corn Syrup.

• Easily cleaned and can be used over and over again.

• Provides means of accurate measurement.

• Makes the 2 lb. tin an excellent gift.

• The protective cap prevents evaporation.

Tell the boys the contents of famous "Crown Brand" Corn Syrup.

CROWN BRAND CORN SYRUP

The Finest in Every Bottle THE CANADA STARCH CO., Limited, Montreal

Colony House For Poultry

Building On Nova Scotia Farm Service Double Purpose

A colony house that serves the purpose of brooder house and open shelter is one of the features of Lower Poultry Farm, in Nova Scotia. It is built on sids for easy transportation. In the early spring it is used for brooding chickens.

A coal stove supplies the heat for brooding the first broods. As the weather gets warmer the whole front can be removed in sections, leaving the shelter open. When the weather arrives the sides and back are also removed in sections and the house becomes a first class open air shelter.

Mr. Roddick, who was a garage-man before he became a poultryman, is mechanically inclined. He has made the movement of these colony houses easy. Two low black wheels on an axle long enough to reach under the sids fit into grooves at the rear end of the sids.

As a front is jacked up in its turn and another pair of low wheels with a swinging bunker on top to hold the sids, the house can be moved.

Mr. Roddick has a number of these houses in use and finds them very satisfactory.

Safe From Air Attack

Says Dwyer To Canada So Slight, It May Be Disregarded

The danger to any Canadian province from attack by air is so slight it may be disregarded in this time of peace.

A. R. M. Lower of Dalhousie University said in an interview at St. John, N.E.

Formerly of Winnipeg, Dr. Lower said he had made a study of Canadian defence problems and had concluded that Canadians need not worry over the possibility of conquest from Europe.

As a school of defence, he suggested establishment of anti-submarine patrols for protection, with "aqueous" planes.

"There is no doubt in my mind," Landreth said, "that we have, individually and collectively, to a large degree, evaded our responsibilities during 1935."

Creamery butter production increased from approximately 108,000 pounds in 1929 to 264,000 pounds in 1937. Ontario and Quebec increased their production 41,000 pounds in that period and the prairie provinces 25,000 pounds.

"The danger to any Canadian province from attack by air is so slight it may be disregarded in this time of peace."

A. R. M. Lower of Dalhousie University said in an interview at St. John, N.E.

## Gifts For University

Medical School At London Ties Old Stethoscope And Dentist's Tool

A moustache-looking turkey, used by dentists in grandmother's day to extract teeth (and usually part of the moustache too) has become the property of the Medical School at the University of Western Ontario, London.

The old-fashioned instrument was sent by Dr. J. G. Kirk, of Ladbroke, a graduate of the Medical School in 1928.

Resembling a lumber-jack's cat-hoof, with a long wooden handle ending in a metal hook, the turkey went out of use years ago. Doctors of the Medical School are marvelling at the methods earlier practitioners must have employed when they did a little tooth extraction as part of their day's work.

The book was fitted over the aching tooth, then with a quick twist of the wrist and a little exertion of force, the offending molar was removed. And so was part of a grad's jaw, in many cases.

Dentists in those days didn't bother to say, "This won't hurt much," they said, "It'll be over in a minute."

Dr. Kirk also sent an old wooden stethoscope, of the type carried by stylish doctors inside their coats, but which was used for the most part as a paperweight.

Dr. Kirk also sent an old wooden stethoscope, of the type carried by stylish doctors inside their coats, but which was used for the most part as a paperweight.

## First Aid

Often Cold Sufferers These Pictures Tell You What To Do For Amazingly Fast Relief

To ease pain and discomfort and reduce fever take 2 "Aspirin" Tablets every 4 hours. Repeat 1 or 2 times.

2. If throat is raw from cold, crush and dissolve 3 "Aspirin" Tablets in glass of water... gargle.

Just Be Sure You Get "Aspirin" Tablets. You Will Feel Better in a Hurry

The simple way pictured above often cures colds and relieves pain from discomfort and sore throat attacks.

Try it. Then—see your doctor. He probably will tell you to continue the use of these medicines in easing cold symptoms. Perhaps the easiest, most effective way yet discovered.

This simple way, backed by scientific authority, has largely supplanted the use of many remedies in easing cold symptoms. Perhaps the easiest, most effective way yet discovered.

## Snicklefritz

Aunt Tessie: "Sakes alive, I don't  
believe any woman could ever be so  
fat."

Uncle Jake: "What y' reading now,  
Toss?"  
Tessie: "Why, this paper tells about  
an English woman who lost two thou-  
sands!"

Bloop: "My wife had a dream last  
night, and thought she was married  
to a millionaire."  
Bloop: "You're lucky. My wife thinks  
that in the daytime."

He-se: "What make you think  
there is a woman in the moon?"  
She-se: "No man would stay up  
there that long and be out every  
night."

Teacher: "What cow in Canada is  
best known for the amount of milk it  
gives?"  
Tommy: "Magnesia, man; all the  
drug stores sell its milk."

Father: "What you want now?  
Haven't I just set up your husband in  
business?"  
Married daughter: "Yes, but O-  
wall wants you to buy him out!"

"I've got a new job, so I can't do  
yo' washin' no mo'."  
"What is it, Mandy?"  
"My new job is dat I can't work  
I'm on relief."

Diddle ever hear about the Scotch-  
man who ran up and down the street  
in front of his house whenever the  
people remarked there was a nip in the  
air.

Magistrate (to seedy looking man):  
"Where were you born?"  
Magistrate: "Where you brought up  
there?"  
Prisoner: "Aye, often."

Three weeks later Jessie reached  
boarding school, she began signing her  
letters "Jessica." Brother Tom didn't  
like it. He replied:

"Dear Jessica: Daddie and Momma  
have gone to visit Aunt Jessica and  
Aunt Lizzie. Uncle Sammie is going  
to buy a new machine, but he doesn't  
know whether to buy a new Cheviot  
or a Fordica. The Corvica had a cat  
and I was going to call it Nollie, but  
changed it to Jimmie because it was  
a bullock. Your loving brother,  
Tommy."

"Are you the man who gave my  
brother a dog last week?"  
"I am, mother says to come and  
take them all back."

Lord Deities, an American visit,  
told an election story.  
A candidate, he said, came home in  
the small hours and gave his wife the  
glorious news:

"Darling, I have been elected."  
She was delighted. "Honestly!" she  
said.  
He laughed in an embarrassed way.  
"Oh, why bring that up?"

Dunk Dora thinks a combination  
shot is underwear gone to the ragman.

And then there was the omen because  
they have so many berths aboard.

## WHAT ABOUT GOOD SEED

With the gradual approach of spring  
many grain producers will be consid-  
ering the question of seed for the com-  
ing crop. In districts where the farm-  
ers get together and order a car-  
load there are certain advantages to the  
plan. Consult your elevator agent re-  
garding supplies of good seed.

## CARD OF THANKS

We wish to thank the organist and  
choir of the United Church for music  
rendered, and those who sent flowers  
in any way assisted during the ill-  
ness and death of our father, Mr.  
Eller Hill.

Sam and Grace Garrett and boys,  
Lula Brown,  
Urie and Jimmie Fisher,  
Gladys Jones.

CANADIAN CODFISH SCALLOP  
WINS FRIENDS

The ground is powdered white  
with new-fallen snow, there's a crisp tinge  
to the air, and the appetite runs away  
with itself. That's the time to bring  
out your hearty main dishes, good  
rich-to-the-bone meals, that build en-  
ergy for cold days. Just try this Ca-  
nadian Codfish Scallop and see how  
well your family like it, and hear  
them ask for it again and again.

Canadian Codfish Scallop  
1 cup Canadian codfish  
1 pint milk, chopped (optional).  
2 eggs, well beaten. Pepper.  
3 cups mashed potatoes.  
2 cups milk, scalded.  
2 tablespoons butter.  
Salt (if needed).

Fill the codfish very light and par-  
boiled. Drain. Add to mashed potatoes,  
and mix in pint milk. This may be  
mixed if desired, but it adds a touch  
of colour and a spice of flavour that  
makes the dish outstanding. Add the

## Commercial Printing

Do not try to economize on necessary  
expenses. Neatly printed business sta-  
tionery is just as important to your  
business as any other of your necessary  
expenses, and it is poor economy to do  
without it. Blank writing paper and  
forms on which your name is written  
in with ink do not raise the prestige of  
your business. And if it's economy that  
you want, see us and find that our new  
prices are most reasonable.

## NOTICE TO RATEPAYERS

IN THE DRUMHELLER MUNICIPAL  
HOSPITAL DISTRICT NO. 3

All ratepayers who are assessed in respect of property within  
the Hospital District as above must pay a minimum tax of \$6.00  
for hospital purposes by the 1st day of March, A.D. 1939, and each  
subsequent year.

Payment should be made to the City Clerk and Treasurer in  
the City of Drumheller, and to the respective Secretaries of Municipal  
Districts, Villages and Hamlets in the rural areas. In the case of those resident in Improvement Districts, payment should  
be made to the person duly appointed to receive payment of taxes.  
This levy is made under authority of the Honourable Minister  
of Health. To obtain the Hospital supporters' fee of \$1.00 per day  
for themselves and dependents, ratepayers will be required to pro-  
duce a receipt as proof of payment of the minimum tax.

MIDLAND PACIFIC GRAIN  
CORPORATION, LIMITED

"The Midland" did as much as any other orga-  
nization in getting the present Wheat Board, but  
are not sending field men abroad broadcasting  
their efforts.  
"The Midland" solicits your business by a keen  
competitive operation that brings best returns  
to the farmer."

YES SIR!  
WE APPRECIATE THEM

THE OTHER DAY WE ASKED A MAN FOR HIS PRINTING  
AND HE TOLD US:

"OH, OUR PRINTING DOESN'T AMOUNT TO MUCH, ALL  
WE HAVE IS A FEW SMALL ORDERS, AND NONE OF THEM  
EVER RUN INTO ANYTHING THAT LOOKS LIKE MONEY."

THOSE LITTLE ORDERS ARE THE KIND THAT MAKE  
OUR BUSINESS.

MOST OF OUR BUSINESS IS IN PRINTING LETTERHEADS,  
• ENVELOPES, CIRCULARS, POSTERS, OFFICE FORMS, AND  
OTHER SMALL ORDERS.

WE APPRECIATE A SMALL ORDER AS WELL AS WE DO  
A BIG ONE.

SO, IF YOU HAVE ANY SMALL ORDERS FOR PRINTING,  
WE WANT YOU TO KNOW THAT WE ARE GLAD TO GET  
THEM. WE APPRECIATE THEM JUST AS MUCH—AND  
TAKE JUST AS GOOD CARE OF THEM—AS IF THEY AC-  
TUALLY AMOUNTED TO HUNDREDS OF DOLLARS.
